

Authorization Web Lookup Tool

August 2026

PARTNERING
FOR A
SAFE ONTARIO

Purpose

- The Authorization Web Lookup Tool provides the public with a simple, centralized way to verify whether an individual, organization, device, or facility is authorized to operate or perform regulated work. It helps protect consumers by providing access to current authorization information.

Current State

- Today, authorization information is maintained across **three separate manual lookup tools** on our website
 - Find an Authorized Heating Fuel Contractors
 - Find a Certificate of Authorization Holder (Boilers & Pressure Vessel)
 - Find Accredited Training Providers

Future State

- We are developing an **Authorization Web Lookup Tool** that will:
 - Replace all three existing manual tools
 - Consolidate authorization information into a user-friendly platform
 - Expand coverage to include additional authorization types

Authorized Heating Fuel Contractors

Registered Fuels Contractors are the only businesses that are legally authorized to do fuels related work in Ontario. Find or verify companies with a valid TSSA Registration. Information in this registry does not constitute an endorsement or referral by TSSA. We encourage any person hiring a contractor to choose carefully. For more information, see our [Qualified Contractor Checklist](#).

Note: City/postal code only refers to the location where the contractor has based their main office. It is possible they may offer services in other areas of the province.

This tool is updated at the beginning of each month.

BREEZE HOME COMFORT INC.

FS-R-53630
121 Seahorse Ave Brampton, ON, L6V 4N5, Canada

MYFIRE PROTECTION INC.

FS-R-53629
1200 Aerowood Dr, Unit 41-42, Mississauga, ON, L4W 2S7,
Canada

Find a Certificate of Authorization Holder

The Technical Standards and Safety Authority (TSSA) adopts standards and administers the policies, procedures and processes for the certification of welders and brazers regulated under the Technical Standards and Safety Act, 2000's Ontario Regulation 220/Ol: Boilers and Pressure Vessels (BPVs). Businesses that repair/alter BPVs and install/repair associated piping systems are required to hold a Certificate of Authorization (COA) from TSSA or another Canadian jurisdiction. Companies with a National Board Certificate of Authorization ("R" stamp) are also acceptable for repairs/alterations of BPVs.

"In the following directory, you can find a listing of businesses that hold a COA issued by TSSA. Please note that the information in this directory is updated periodically and may not reflect the most recent information available for each entry. If you have a question or concern regarding any of the information contained on this page, please contact customerservices@tssa.org or call 1-877-682-TSSA (8772)."

Ski Lift Mechanic

The Technical Standards and Safety Authority sets the mandatory training and certification requirements for working in six regulated industries in Ontario:

- Amusement Devices
- Boilers and Pressure Vessels
- Elevating Devices
- Fuels
- Operating Engineers
- Ski Lifts

Training providers must be accredited by TSSA before they can offer training programs in TSSA-regulated industries. Accredited training providers must have subject-matter expertise and practical experience in the areas for which they will provide training.

Individuals or organizations seeking accreditation must submit an application via the [Client Portal](#) to TSSA and meet curriculum requirements outlined in the relevant policies and procedures.

Please use the directory to look for an accredited training provider, noting that the directory is updated periodically and may not reflect the most recent information.

If there are questions or concerns about information found on this page, please contact customerservices@tssa.org or call 1-877-682-TSSA (8772).

Project Deliverables

Create a public-facing authorization lookup tool on the website for individual and organization authorizations

Real-time or near real-time lookup

Self-service verification

Standardized experience across programs

Objectives

Increase transparency and improve safety with easy access to legal operators

Improve stakeholder confidence

Reduce customer inquiries

Support digital transformation

Authorizations in Scope

- Individuals
 - All certificate types
- Organizations
 - Subset of authorizations across the programs
- For both individuals and organizations, we will include authorizations that are:
 - Active
 - Expired – Eligible for Renewal
 - Cancelled
 - Suspended
 - Revoked

List of Authorizations in Scope

Name	Program
